

Agricultural Sprayer

① Night cruise light

Cruise lights under each blade
Easy to observe and manipulate

② High pressure nozzle

Stronger penetration and more thorough spraying

③ Carbon fiber bracket

Good toughness and light weight
Solid, high tensile strength

④ Large-capacity medicine barrel

Outlet sinking treatment,
To prevent the residual dose,
the water cover should increase
the diameter

⑤ V-shaped tripod

V-shaped tripod design
More stable against wind

⑥ Chemical liquid reactor

Support breakpoint continuous
spraying, Automatic return when
the dose is insufficient

⑦ Large flow medicine pump

The pressure is stronger
Atomization is more delicate

⑧ Large water cover

Increase the diameter of the water cover
Efficiency upgrade

⑨ Sunken battery

fast charging; loop easier

⑩ Brushless motor

Special for plant protection machine,
waterproof and dustproof;
Anti-acid and alkali, good heat dissipation

⑪ Carbon Fiber Folding Paddle

Convenient storage of energy consumption;
Helps extend flight time

⑫ Front HD camera

Looking ahead from a distance
Anticipate obstacles ahead

⑬ High brightness LED lighting

Equipped with dual high-brightness LED lighting
Convenient for night work

⑭ High-precision GPS

Multiple protection, precise positioning
Flying at full speed with full load will never drop high

Lawn mower

Engineering rubber track

Good climbing
performance and
durability

Chassis hydraulic lift

The chassis can be lifted
and lowered by remote
control, and the height
can be adjusted arbitrarily,
which effectively
improves work efficiency.

Spiral throwing knife

Mowing without pressure,
dense chain gaps prevent
weeds from splashing,
and high-strength
hardness blades for
longer life
